

EQUUS MATACRYL PEDESTRIAN MEMBRANE

PUMMA Elastomeric waterproofing membrane

Matacryl Pedestrian System is a liquid applied, PUMMA elastomeric waterproofing membrane designed to waterproof and protect concrete decking areas. The system is designed for easy application and easy maintenance with an integrated non-skid surface profile. The **Matacryl Pedestrian System** is a multi-layer application, it comprises of a waterproofing membrane layer, wearing layers, and topcoats specific for end use requirements. Available in both a painted, and a decorative quartz finish.

Matacryl is a fast-curing membrane, meaning minimal disruption and downtime for the building owner. The cured system is a flexible membrane that retains its flexibility and crack-bridging performance in service.

Matacryl membrane has a wide range of application areas as well as a carparking membrane. Other applications can include as a bridge deck waterproofing membrane, sub-grade waterproofing including below-grade slabs, pedestrian and vehicular trafficable areas, tunnels, channels and dam structures.

Key Benefits:

- Highly flexible membrane
- Easy to apply using a roller or a squeegee
- Thixotropic version available for vertical surfaces
- Excellent waterproofing properties
- Very high impact and puncture resistance
- Withstands stress and movements in the substrate
- Excellent adhesion to many types of substrate
- Good chemical and abrasion resistance
- Can be applied over a wide range of ambient and substrate temperatures (-10°C to +35°C)
- Can easily be repaired; excellent inter-layer adhesion due to chemical bonding
- Overcoating time not critical
- Fully cured one hour after application

Technical Support:

- Project Specific specifications and details
- On-site quality assurance
- Approved/licensed application nationwide
- Extended Warranties available
