## Corrosion and stain resistant primer

February 2024

### PURPOSE AND AREAS OF USE:

A corrosion and stain resistant primer for use on exterior and interior cementitious surfaces.

### PRODUCT:

A waterborne modified acrylic primer, with special pigmentation to enhance stain-block and anti-rust capabilities.

### PROCESS COMPATIBILITY:

Can be used as a primer under Chevaline waterborne acrylic coatings. May also be used under some Keim mineral paints (discuss with local Equus Representative).

### STANDARD PACKS:

4, 10 and 20 litre plastic pails.

### PHYSICAL PROPERTIES:

Liquid Material	
Solids (% by volume)	37%
Specific Gravity	1.23
Flash Point	Not applicable - waterborne material
Shelf Life	Three years in original sealed containers when stored in cool dry conditions and protected from frosts.

Applied Film	
Flexibility	Passes 2 mm mandrel
Adhesion	Excellent adhesion to the surfaces listed in Areas of Use.
Fungus Resistance	Chevaprime UM contains a highly effective mould-resistant additive which does not contain toxic metals or phenols.

### SURFACE PREPARATION:

Ensure surface to be coated is free of dust and contamination. Any form release agents and curing compounds, or remnants thereof, must be removed.

### APPLICATION METHOD:

By brush, roller or spray direct from pail. Thinning is not normally required.

### APPLICATION PROPERTIES:

#### Spreading Rate:

Theoretical	10-12 sqm/litre
Practical	8-10 sqm/litre
Recommended film thickness	35 µm

#### Dry times:

Touch dry	1-2 hours
Recoat time	6-8 hours

**Thinning/Cleanup:** Water

### HEALTH AND SAFETY:

As a minimum protection wear protective clothing and barrier cream on hands when handling this product. It is a waterborne material and therefore, is non-flammable. However it is recommended NOT TO SMOKE when handling or applying this product. No special conditions are required other than protection from frost and prolonged heat. Refer to Safety Data Sheet before use.
